

PRESENT: SKIP FANGMAN, KATHY ZEMBRODT, AL FEDDERS, BOB WINTERS, JAY BAYER

minutes from last meeting were read and approved

Went over work being done on Exter Dr and Sanitation working on fixing the flooding for parkview area of exter dr.

Skip discussed the Devon Golf Course Flooding that creates silt in millers pond. Covington was contacted to correct and SDI is going to correct with a Plunge Pool to catch the run off.

People were contacted such as Schiothaur, on the Jacksco about flooding issue and SDI says it is on private property.

Al spoke about the water running down and nothing catching run off that goes into driveways. Catch basin at bottom doesn't work right to catch the water. SDI would do a 50/50 if we did a fix because we would be adding new sewer. Saingarden was suggested last year, when talked about, because the cars turn and make the hole bigger. Curbing may make it better and Skip mentioned that they put an asphalt curb in front of some drives to help the run off.

Behind Cardoso's SDI fixed with fill and put grass, also fixed pip on Amsterdam to correct some water issue, but a part of amsterdam still needs correcting, and possibly a new manhole and new piping which would be at 50/50 with SDI also because of adding new pipe.

Jay said Prelim drawings on Old State to redo along with the Storm sewer on Amsterdam, are being finished in order to Bid. Amsterdam also working on to redo existing width and full depth repair in spots. Recommended Amsterdam to go to Bid for this.

Spoke about 2 way on Amsterdam and maybe Covington Sharing, but no going to do now. too much money and state has cut programs.

Bryen Aylor problem not resolved yet, contact with SDI on what to do. Michaels is working on problem at 1158 Cleveland Ave.

Concerning speed bumps for Ausubon, residents were contacted and 85% want them. Copy of Ft. Thomas protocol to use for Bumps is being looked at. Per Jay, Temp Spp(ed) Bumps can be used to try. Grainger and U-line carry them.

Terrace - need punch list done and the dip to be fixed near water main. could cause problems later if not done now.

SDI agreed to fix sewer on one side of amsterdam where sewer is really bad

Discussed with Jay to do an est of streets remaining to do to get an idea of how much and how long it would take approximately. Jay said approx. 2000.00

Recommended sealing the present street for prevention of water getting under pavement where needed.

Asked for Estimate for next meeting for leaf pick up.

8 pm adjourned
