

## MINUTES FOR INFRASTRUCTURE MEETING TUES: 5,6 PM 9/27/11

### TERRACE

Discussed curbing installed and mill and overlay the street would take approx 1 month to complete.

Hopefully by Nov 2011 to be done.

Also talked about trees being replaced.

### CLEVELAND/JACKSON

Discussed Mill and Overlay, scraping off 2" of surface, some places deeper and wider if need.

Contractor will watch while installing to check for problem areas to address as done.

Upper Jackson most residents don't want it widened if and when the curbing goes in but lower Jackson is wider already.

Discussed when Jay has completed his research that the city would commit to start on the project for the "big fix" .

Property owners on lower Jackson have a water problem from hill, and some from driveways, street and yard runoffs. Jay said not all from street.

Discussed if water can be taken away and city help in costs to carry away from back yards of lower Jackson properties.

Al stated to resident that there are easements, but on upper Jackson resident stated that if upper widened the street would be in her front door.

Costs discussed and with tax funds, possibly the "big fix" can be done in 3-4 yr stage in order to pay for.
