

10/17/16 Infrastructure meeting minutes

7:10 meeting start

Present: Monty O'Hara, Kathy Zembrodt, Jay Bayer, Jim Jenkins, Dan VonHandorf

Discussed letters from residents on Altavia concerning off street parking pads.

The owner of 1050 Altavia recently sold his home and asked if he had to have the parking area in front and we discussed and said it had already been constructed. A couple of residents have elected to install private driveways for their own personal needs and asked that there not be a parking area in front of their home since they have installed their own. There was a comment about of different lengths of the parking pads and that was addressed that some were a little larger or smaller when considering utilities or walls that may be in the way. Also a question of not having off street parking area at the beginning of Altavia, but that was addressed in prior meetings that the larger opening to the street was to accommodate a wide turn for trucks and buses turning onto the street. It is also a law that you can't obstruct the entrance of a street nor be within x amount of feet from a stop sign.

Arlington was closed 10/17 to tie in the Sewer for Aberdeen project for SD1.

Amsterdam is being tied into the sewer and catch basin and replacing curb but was able to leave the grate alone.

The committee talked about a possible sidewalk from Aberdeen to the Dixie highway to investigate the best way and side to install it on.

Jay is working on Cleveland and Lower Jackson to get on preliminary work.

Monty is going to meet with Ms. Keltz, and handrail on Alhambra is going to be taken care of after parts picked up.

Adjourn 8:15
