Committee Reports. Public Works Dept.

Usual repairs made.

The analysis of the water from the Disposal plant read. The water is free from contagious disease germs but a greater use of Chlorine would kill ^{more} bacteria.

The water line along Amsterdam Road was inspected by the City Engineer. The report was that the valves on Amsterdam Road are in good condition and the valve at Rose Circle was also in good working condition. The Engineer stated that if the valve on Rose Circle was opened and the valves at the foot of Amsterdam Rd. and Montague were closed the water could flow to Locust Street and the water pressure would be about 125 lbs.

The Safety Committee will make an effort to have the low water pressure condition remedied on Locust St.
