# Pavement Condition Index (PCI)

PCI RANGE	CONDITION
≥90	GOOD
80-89	SATISFACTORY
70-79	FAIR
60-69	POOR
<60	VERY POOR

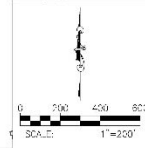

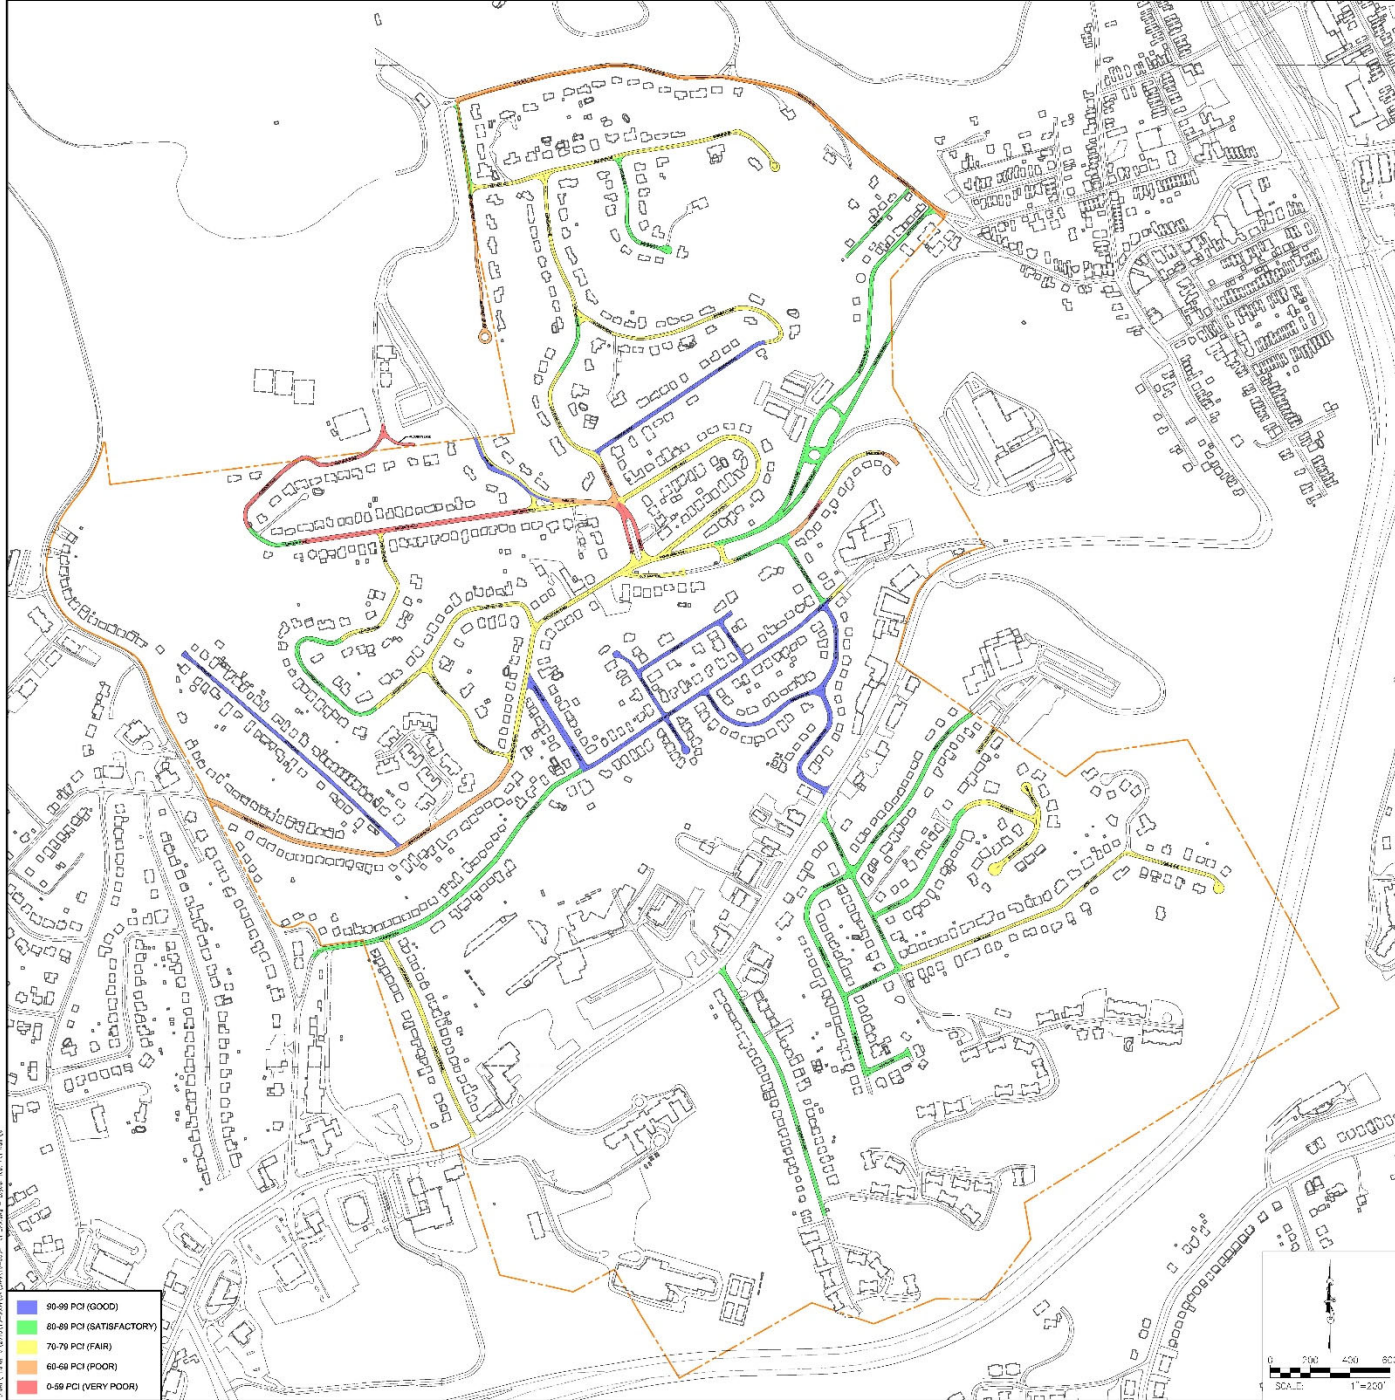

- Provides a numerical rating for the condition of roadways and/or road segments.
- 0 being the worst condition; 100 being the best
- Used to identify immediate maintenance & rehab needs, monitor pavement condition over time, develop preventative maintenance strategy & budgets, & evaluate cross sections
- Items that affect PCI: surface defects, surface deformation, cracking, etc.
